Ladies:

Following up on this conversation, I want to make sure it doesn't continue to move forward without properly running the final location for the hook up with the Councilman. If this project has been put on hold through this crisis, I completely understand. Please advise.

Thanks,

Gaby

Hello Sarah & Janice:

Thank you for the call today and I apologize for my level of frustration when it comes to this project. We would like to work with you and the rest of your team to find an active connection that will be suitable for all parties involved.

As you can see below, Sarah connected me with Jasmin (12/2019) who advised on the proposed placement of the sewer connection. This is the location the Councilman approved and this is the location we walked with your staff on January 22. Can you please forward us any information/ emails you have that show this location as inactive? As well as who authorized the connection at 253rd and Vermont? Thank you, your time is appreciated.

Best,

Gaby

Hi Gabriela,

Nice to virtually meet you and thank you for your questions.

We would be installing the clean out drain near our fire hydrant connection please see attached photo with the red circle of the clean out location. I have attached a photo of a previous clean out drain we've installed. This is really our only option but the drain itself is very small. Normally the construction will only take 1-2 days from start to finish.

Let me know if you have any more questions.

Additionally, can you please advise where the infrastructure improvements will take place along the intersection? Based on current standards, are there options?

Good morning,

Is there a decision on the clean out drain?

Thank you,

Sarah

+ Jenny & Dennis

Sarah:

Jenny, Dennis, and I met with the Mayor's team last week on this matter. I am cc'ing Jenny in this email for final approval since the discussion included her at the table.

Thank you,

Gaby

Hi Gaby,

As you know, the mobile hygiene center has been deployed weekly at Lomita/McCoy. There are a high percentage of homeless people (up to 25 per day) utilizing the mobile hygiene center. At this time LASAN would like to move forward with installing permanent infrastructure in the form of a clean out drain for the gray and black water. The drain would connect to our existing sewer infrastructure. The mobile hygiene unit would still need to be deployed to the location but it's drainage mechanism would become permanent. Does your office have any issue with us moving forward with this?

Please advise.

Sarah
